

CFS Project — Complete API Inventory

Generated 2026-09-09 · Lists every API file, its exported function name(s), and the page/section where it is used.

A. Client-side API wrapper functions (src/api/)

File Name	API / Function Name	Used In (Section / Page)
src/api/blog/api.ts	fetchBlogs(page)	src/app/page.tsx (Home) · src/app/home-demo/page.tsx · src/app/caravan-sales/page.tsx · src/app/author/tom/page.tsx · src/app/(blogs)/blog/page.tsx · src/app/(blogs)/blog/page/[page]/page.tsx · src/app/(sitemap)/blogs-sitemap.xml/route.ts · src/app/api/home-blogs/route.ts
src/api/blog-list/api.ts	fetchBlogDetail(...) unused	No importer found. Blog detail page uses a separate local fetchBlogDetail from src/app/[slug]/fetchBlogDetail.ts instead. Likely leftover duplicate.
src/api/enquiry/api.ts	createProductEnquiry(payload) unused	No importer. Actual enquiry forms (ListContent/enquiryform.tsx, product/[slug]/CaravanDetailModal.tsx) call /api/enquiry/ route directly instead.
src/api/feedback/[id]/api.ts	fetchCaravanList() unused · POST(...)	fetchCaravanList has no importer. POST is a CF7 feedback proxy handler misplaced under src/api (comment says it belongs at src/app/api/cf7/[id]/route.ts); not wired into routing.
src/api/home/api.ts	fetchHomePage()	src/app/off-road-caravans/page.tsx · src/app/page.tsx (Home) · src/app/home-demo/page.tsx · src/app/caravan-sales/page.tsx
src/api/homeApi/featured/api.ts	fetchHomeFeatured(params)	src/app/page.tsx (Home) · src/app/home-demo/page.tsx
src/api/homeApi/state/api.ts	fetchStateBasedCaravans()	src/app/off-road-caravans/page.tsx · src/app/page.tsx (Home) · src/app/home-demo/page.tsx · src/app/caravan-sales/page.tsx
src/api/homeApi/typeCounts/api.ts	fetchTypeCounts()	src/app/page.tsx (Home) · src/app/home-demo/page.tsx
src/api/homeSearch/api.ts	fetchHomeSearchList() · fetchKeywordSuggestions(query)	src/app/listings/StateFilterBar.tsx · src/app/searchError.tsx
src/api/homeSearchKeyword/api.ts	fetchKeywordSuggestions(...) unused	Duplicate of homeSearch/api.ts version. No distinct importer resolves to this copy.
src/api/listings/api.ts	fetchListings(...) unused	No importer found. Likely superseded by src/app/listings/fetchInitialPool.ts and direct /api/pool-listings fetches.
src/api/location/api.ts	fetchLinksData(filters) unused	No importer found.
src/api/location/api.ts	fetchLocations(keyword) live	src/app/listings/StateFilterBar.tsx
src/api/model/api.ts	fetchModelsByMake(make) unused	No importer found.
src/api/postRquirements/api.ts	fetchRequirements()	src/app/off-road-caravans/page.tsx · src/app/page.tsx (Home) · src/app/home-demo/page.tsx · src/app/caravan-sales/page.tsx · src/app/postRequirement.tsx

<code>src/api/productList/api.ts</code> canonical	<code>fetchMakeDetails()</code> · <code>fetchProductList()</code>	<code>src/app/listings/[...slug]/page.tsx</code>
<code>src/api/productList/api.ts</code>	<code>fetchModelCounts(...)</code> / <code>fetchMakeCounts()</code> / <code>fetchCategoryCounts()</code> unused externally	<i>No importer outside this module.</i>
<code>src/api/productList/api copy.ts</code> whole file unused	<code>fetchMakeDetails,</code> <code>fetchModelCounts,</code> <code>fetchMakeCounts,</code> <code>fetchCategoryCounts,</code> <code>fetchProductList</code>	<i>Full duplicate of productList/api.ts. Not imported anywhere — leftover backup file (name literally contains "copy").</i>
<code>src/api/make-new/api.ts</code>	<code>fetchMakeDetails()</code> unused	<i>Third duplicate of this function. Calls /api/make-details/ but no importer found.</i>
<code>src/api/sitemapSearchKeyword/api.ts</code>	<code>fetchSearchkeywords(...)</code> unused	<i>No importer found.</i>
<code>src/api/usedBlog/api.ts</code>	<code>fetchUsedBlogList()</code> unused	<i>No importer found.</i>

B. Next.js route handlers (src/app/api/) — server endpoints

File Name (Route)	Handler	Called From (Section / Page)
<code>src/app/api/avatar/list/route.ts</code>	GET	<code>src/app/images/page.tsx</code>
<code>src/app/api/banners/route.ts</code>	GET	<code>src/components/BannerHandler.tsx</code>
<code>src/app/api/caravan-enquiry/route.ts</code>	POST	<code>src/app/caravan-enquiry-form/enquiry.tsx</code>
<code>src/app/api/category-snapshot/route.ts</code>	GET orphaned	<i>No caller found</i>
<code>src/app/api/contact/route.ts</code>	POST	<code>src/app/contact/contacts.tsx</code>
<code>src/app/api/coords/route.ts</code>	GET orphaned	<i>No caller found (related src/utls/postcodeCoords.ts also unused; calls OpenStreetMap directly)</i>
<code>src/app/api/enquiry/route.ts</code>	POST	<code>src/app/components/ListContent/enquiryform.tsx</code> · <code>src/app/product/[slug]/CaravanDetailModal.tsx</code>
<code>src/app/api/home-blogs/route.ts</code>	GET orphaned	<i>No caller found (wraps fetchBlogs from src/api/blog/api.ts)</i>
<code>src/app/api/home-featured/route.ts</code>	GET	<code>src/app/caravan-sales/HomeFeatured.tsx</code> · <code>src/app/off-road-caravans/HomeFeatured.tsx</code>
<code>src/app/api/home-search/route.ts</code>	GET	<code>src/api/homeSearch/api.ts</code> → <code>StateFilterBar.tsx</code> , <code>searchError.tsx</code>
<code>src/app/api/indexed-url/route.ts</code>	GET	<code>src/app/listings/home.tsx</code> · <code>src/app/listings/home copy.tsx</code>

src/app/api/kv-invalidate/route.ts	POST external only	No in-app caller (invoked externally/manually per code comment)
src/app/api/listings-410/[...slug]/route.ts	GET	src/middleware.ts (internal rewrite)
src/app/api/location-search/route.ts	GET	src/api/location/api.ts (fetchLocations) → StateFilterBar.tsx
src/app/api/make-details/route.ts	GET	src/app/listings/StateFilterBar.tsx (direct fetch) · src/api/make-new/api.ts (dead)
src/app/api/params-count/route.ts	GET	src/app/listings/StateBrowseSection.tsx · src/app/listings/StateFilterBar.tsx
src/app/api/pool-listings/route.ts	GET	src/app/listings/fetchInitialPool.ts · src/app/listings/home.tsx · src/app/listings/home copy.tsx · src/utls/fetchListingsHead.ts
src/app/api/product-exists-check/route.ts	GET	src/app/listings/StateBrowseSection.tsx
src/app/api/product-list/route.ts	GET	src/app/listings/StateFilterBar.tsx (direct fetch)
src/app/api/report-error/route.ts	POST	src/app/error.tsx · src/app/product/[slug]/error.tsx · src/components/GlobalErrorTracker.tsx
src/app/api/revalidate/route.ts	POST external only	No in-app caller (external webhook trigger per comments)
src/app/api/track/route.ts	POST	src/app/listings/StateListingGrid.tsx
src/app/api/track-click/route.ts	POST	src/app/listings/StateListingGrid.tsx
src/app/api/track-product/route.ts	POST	src/app/product/[slug]/product.tsx · src/app/product-detail-demo/ProductDetailDemo.tsx

C. Other fetch/API helper files (outside src/api/ and src/app/api/)

File Name	API / Function Name	Used In (Section / Page)
src/app/[slug]/fetchBlogDetail.ts	<code>fetchBlogDetail(...)</code> live	src/app/[slug]/page.tsx · src/app/[slug]/layout.tsx (Blog detail page/layout)
src/utls/postcodeCoords.ts	<code>fetchPincodeCoords</code> unused	Whole file has no importer
src/app/listings/fetchInitialPool.ts	<code>pool-listing</code> <code>fetch</code> <code>helpers</code>	src/app/listings/[...slug]/page.tsx · src/app/listings/home.tsx (server-side initial data)
src/utls/fetchListingsHead.ts	<code>listings</code> <code>head-data</code> <code>fetch</code> <code>helper</code>	Supports /api/pool-listings (Listings section)

Summary — Dead / Duplicate API Files (no importers found)

- src/api/blog-list/api.ts (fetchBlogDetail)

- src/api/enquiry/api.ts (createProductEnquiry)
- src/api/feedback/[id]/api.ts (fetchCaravanList)
- src/api/homeSearchKeyword/api.ts (fetchKeywordSuggestions – duplicate)
- src/api/listings/api.ts (fetchListings)
- src/api/location/api.ts (fetchLinksData only – fetchLocations in same file IS used)
- src/api/model/api.ts (fetchModelsByMake)
- src/api/productList/api copy.ts (entire file – full duplicate)
- src/api/make-new/api.ts (fetchMakeDetails – third duplicate)
- src/api/sitemapSearchKeyword/api.ts (fetchSearchkeywords)
- src/api/usedBlog/api.ts (fetchUsedBlogList)
- Route handlers with no in-app caller: category-snapshot, coords, home-blogs, kv-invalidate, revalidate
